

IOT SMART LIFE

ETVEX DOOR ENTRY

one-family

two-family

IP over 2 wires. High performance and simple wiring.

View Door App <u></u>

The performance of IP technology comes together with the simplicity of 2-wire wiring.

High-performance and easy to install, **with just 2 wires**, the video door entry kits allow you to check who is ringing at your door, even when you're out. Thanks to the **monitor with integrated Wi-Fi** and to the **View Door** App, you can receive and manage video door entry calls directly from your smartphone or tablet.

Our video door entry kits all boast **Full-HD video quality** (2 Mpx resolution), a **wide recording angle** and allow up to 3 calls to be made simultaneously, connect sensors and select the related scenarios, as well as use transponder cards. The one- or two-family kits are expandable, to create systems **for up to four families**, with 4 indoor stations per apartment, 4 outdoor stations, 8 cameras per apartment and 20 shared cameras, visible from all the apartments in the system.

Everything is always under control from your smartphone or tablet.

The **View Door** App is simple and boasts a user-friendly graphic interface, allowing you to **answer video door entry calls** from your smartphone or tablet, to **control the lock** in your home and to **view the pictures transmitted by the outdoor station and by any** cameras installed and connected.

The IP over 2 wires kits.

K40980

IP over 2 wires surface mounting video door entry kit containing: 1 handsfree touch screen monitor, integrated Wi-Fi for call repetition on smartphone with dedicated App, 7" LCD colour display, complete with bracket for surface mounting (40980.M), 1 audio/video entrance panel with rain-proof frame configurable for 1, 2 or 4 families, RFID for access control, with relay output configurable as NO or NC for electrical lock or voltage-free contact (40980.P), 7 Mifare coloured RFID cards (40169), 1 power supply unit (40105).

K40981 IP over 2 wires surface mounting video door entry kit containing: 2 handsfree touch screen monitors, integrated Wi-Fi for call repetition on smartphone with dedicated App, 7" LCD colour display, complete with bracket for surface mounting (40980.M), 1 audio/video entrance panel with rain-proof frame configurable for 1, 2 or 4 families, RFID for access control, with output configurable as NO or NC for electrical lock or voltage-free contact (40980.P), 7 Mifare coloured RFID cards (40169), 1 power supply unit (40105).

12 good reasons to choose our video door entry kits.

Ready to use

No need for programming, simply connect the devices with just 2 wires.

Connection with just 2 wires

Just 2 wires are required to connect the outdoor station, the power supply unit and the indoor station.

Expandable

The system can be expanded by connecting up to 4 indoor stations for each home and 4 outdoor stations.

5

Calls and conversations between indoor stations installed within the same system are possible, even between different homes.

Multiple communications

UP to 3 simultaneous conversations are possible, between indoor stations and outdoor stations and between different indoor stations.

Call repetition

Indoor stations with additional output for call repetition.

Voice assistants

Compatible with Amazon Alexa and Google voice assistants.

101 [

View Door App To receive and manage video door entry calls directly from your smartphone or tablet.

Scenarios

4 scenarios available (at home, away, night, customised), with alert notification sending to be combined with the 8 indoor station inputs for sensors.

* IP wired cameras supported: Outdoor bullet (4621.2812BA) and outdoor dome (4622.2812BA). Wi-Fi cameras supported: Outdoor bullet (46237.028B and 46237.040A), indoor PT (46239.036C and 46239.040A) and outdoor PT, (46241.030B).

Access control

Access control via RFID card reader in the outdoor station (up to 10 different transponder keys).

IP wired and Wi-Fi camera connection* Up to 8 cameras per home and up to 20 shared cameras, visible from all the homes in the system.

2-wire system retrofits

When refurbishing existing 2-wire systems, the indoor and outdoor stations can simply be replaced, maintaining the same wiring.

Indoor station with integrated Wi-Fi.

> > and cards

40169 - 7 Mifare RFID cards

Outdoor station with integrated Wi-Fi

Thanks to integrated Wi-Fi, the indoor station communicates with smartphones and tablets. And video door entry calls and scenarios can be managed anywhere.

F	2
6	ノ

Intercom indoor stations You can communicate from any indoor station to another indoor station connected to the same system. The call can also be addressed to a specific indoor station.

Video and picture recording

Automatically or in manual mode, you can capture stills and videos of the caller at the outdoor entrance panel.

Micro SD card from 8 to 128 GB

The micro SD card (not included) allows you to capture stills, videos and perform an encrypted Backup of the system for possible resetting.

Call repetition

Indoor stations with additional output for call repetition.

Scenarios

Management of up to 4 scenarios (at home, away, night, customised), with alert notification sending to indoor station and to smartphone with the View Door App.

Sensors

8 customisable inputs available on the indoor stations for the connection of sensors (gas, water, intrusion, etc.) and one 12 VDC input to be combined with the scenarios.

IP wired and Wi-Fi cameras

UP to 8 cameras per home and up to 20 shared cameras can be viewed, visible from all the homes in the system. Auto-search and configuration of the IP wired cameras are possible from the indoor station.

Multi-language menu

NEW

The display menu can be programmed in 8 different languages: Italian, English, French, Spanish, German, Greek, Portuguese and Dutch.

ling the new functions introduced with the latest update.

Update information There is a screen available on the indoor stations signal-

Rain guard and name plate == Entrance panels fitted with rain-proof frame, back-lit name plate and surface mounting accessories.

Up to 4 push buttons

Entrance panels designed to be configured with 4 push buttons in a double row for installation in small residential facilities.

. . .

Backlighting of name plate and icons

The LED backlighting makes the name plates clearly visible, as well as the backlit icons which signal the function under way.

10	-
/ IP	54
_ \ IK	07

Protection degree IP54 and IK07

IP54 protection against dust and water sprays and IK07 protection against mechanical impact.

160° wide-angle camera

Equipped with colour camera with 2 Mpx, wide-angle lens with 160° horizontal and 85° vertical recording angle.

in a version with to 2 call buttons

40980.P + 42920.K in a version with to 4 call buttons with conversion kit

01598 - Programmable transponder card 01817 - Mifare transponder card

Full-duplex audio with Echo Canceller and noise reduction

Echo Canceller means you can have a natural, twoway conversation, automatically avoiding annoying audio feedback (Larsen effect). You will hear loud and clear thanks to the Noise Reduction function.

Multi-language voice messages

Multi-language voice messages in 8 different languages (Italian, English, French, Spanish, German, Greek, Portuquese and Dutch).

Lock and auxiliary services

An electric lock can be powered directly and an auxiliary service can be connected to the relay output with a programmable activation time.

Access control

Access control via RFID card reader in the outdoor station (up to 10 different transponder keys).

Additional IP wired and Wi-Fi cameras.

Up to 8 cameras per home and up to 20 shared cameras can be connected to each IP over 2 wires video door entry kit, visible from all the homes in the system. The cameras can either have an Ethernet connection (IP protocol) or Wi-Fi.
